SUMMARY

Highly disciplined, result-driven Full-Stack Developer leveraging a competitive background as an elite athlete combined with strong entrepreneurial and sales metrics. Specialize in modern web development frameworks including React 19, Next.js 16, and Tailwind CSS v4. Proven capability to engineer fluid, cross-platform workspaces, design asynchronous log-streaming features, and implement clean data tokenization. Recognized for exceptional analytical problem-solving, rapid technical adaptability, and a collaborative growth mindset optimized for fast-paced software engineering teams.

HARD SKILLS

Programming Languages: JavaScript

Frameworks and Libraries: React, Redux, Handlebars, Node.js

Tools and Technologies: GIT, Webpack, Parcel, REST API

Markup and Styling Languages: HTML5, CSS3, SASS, Responsive/Adaptive design

Databases: MongoDB

LANGUAGES

English - Upper-intermediate

Ukrainian - Native

German - Native

Russian - Native

PROJECT EXPERIENCE

1.

Note-Hub

Project Type: Individual Project

Role: Full-Stack Developer

General Description: A full-stack architecture note-taking application designed for secure, streamlined professional data organization.

Functionality: Built secure user authentication modules, maintained client-to-server state persistence channels, connected a relational database layer, and mapped completely responsive layout controls.

Technologies Used: React, Node.js, Express, MongoDB, CSS3

Live Demo: <https://09-auth-delta-seven.vercel.app/>

GitHub Code: <https://github.com/NoobStyleee/09-auth>

2. WebCrafters E-Commerce Platform

Project Type: Team Project

Role: Full-Stack Developer

General Description: A multi-page, high-performance web storefront modeling modern online retail customer acquisition funnels.

Functionality: Led product catalog component configuration, configured automated sorting filters, integrated multi touch hardware sliders via Swiper.js, and standardized operational workflow tasks via Agile/Scrum ceremonies.

Technologies Used: HTML5, CSS3, JavaScript, Swiper.js, Git

Live Demo: <https://vitallypolets.github.io/webcrafters-project-02/>

GitHub Code: <https://github.com/vitallypolets/webcrafters-project-02>

3. DevSpace Portfolio Hub

Project Type: Individual Project

Role: Frontend Developer

General Description: An interactive, browser-based VS Code environment clone designed from scratch to serve as a high-fidelity living technical portfolio workspace.

Functionality: Features a fluid multi-display directory tree matching explicit mobile (320px), tablet (768px), and high end desktop (1440px) breakpoints. Integrates an asynchronous simulated terminal compilation sequence via microtask queues and triggers an inline regular expression parser engine to change text domains into interactive anchors safely on runtime.

Technologies Used: Next.js 16, React 19, TypeScript, CSS Modules, Git

Live Demo: <https://my-resume-mikledansee-9799s-projects.vercel.app/>

GitHub Code: <https://github.com/NoobStyleee/my-resume>

WORK EXPERIENCE

Sales Manager, Roedelbronn Markisen GmbH 2021 - current

- Conducted market analysis, identifying new opportunities for growth.
- Negotiated contracts, increasing average deal size by 15%.
- Drove customer retention initiatives, improving loyalty by 20%.

Sales Manager, Vorwerk Deutschland 2017 - 2019

- Managed end-to-end B2B and B2C customer acquisition, negotiation, and high-conversion client communication pipelines.
- Translated abstract stakeholder metrics into real-world strategic revenue channels.

EDUCATION

IT School GOIT 2025 - 2026

Fullstack Developer

Comprehensive engineering track focusing on modern JavaScript ecosystems, automated compilation stacks, and production deployment parameters.
